NEW YEAR

## 2026 AT-A-GLANCE: SCALE WITH DISCIPLINE

**As we close a defining year for AttoBahn, thank you for your continued confidence and partnership.** This past year marked a shift from vision to execution, as AttoBahn advanced into an operating infrastructure company delivering and validating next-generation digital systems in real-world environments.

**Our mission extends beyond faster connectivity.** We are building foundational infrastructure that defines how data is transported, secured, and monetized in the AI era, supporting critical sectors including healthcare, energy, education, and public services.

### **AttoBahn 2024-2025 Year In Review:**

- Advanced our first revenue-generating infrastructure and pilot agreements, activating our commercialization strategy
- Completed successful U.S. based performance demonstrations validating real-world capabilities

- Expanded into additional high-capacity, strategically interconnected deployment sites
- Strengthened our international intellectual property portfolio with newly granted patents
- Advanced the Secure Data Grid architecture and Cell Frame Over Ethernet (CFOE), reinforcing leadership in performance, efficiency, and security
- Established state-level pilot and RFP frameworks positioning AttoBahn as a long-term Infrastructure-as-a-Service partner
- Formed strategic partnerships enabling early expansion while preserving capital discipline and shareholder value

**Looking ahead to 2026, AttoBahn enters a phase focused on infrastructure delivery and operational scale.** Commercial pathways are defined, our technology stack is proven in live environments, and demand for sovereign, energy-efficient, AI-ready infrastructure continues to accelerate. **A detailed progress update will be issued in January 2026.**

**Phase 1: Commercialization**

Secure “pay-to-play” commitments to fund deployment, preventing speculative build-outs and eliminating equity dilution.

**Customer-Funded Validation**

**Phase 2: Revenue Generation**

Revenue is generated from infrastructure access fees and deployment services, creating a model that can be replicated across regions with increasing efficiency.

**Repeatable Regional Model**

### **Phase 3: Shareholder Returns**

Shareholder returns are tied directly to operating cash flow from mature, deployed infrastructure, not market sentiment.

### **Infrastructure-Backed Returns**

**Wishing you a Happy New Year filled with growth, opportunity, and continued success.**

Darryl Gray

Chairman and CEO
